

PRANTIK PAL

Data Analyst | Python, SQL, Power BI & Tableau | Data Visualization & Statistical Analysis

+91 8700810188 | developerpsquare356@gmail.com | New Delhi, India | [linkedin.com/in/prantik-pal-a86690256](https://www.linkedin.com/in/prantik-pal-a86690256) | github.com/developerpsquare356

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in Python, SQL, Power BI, and Tableau, specializing in data wrangling, exploratory data analysis (EDA), statistical analysis, and predictive modeling (Linear Regression, Decision Tree, Random Forest) using Pandas, NumPy, Matplotlib, Seaborn, and Scikit-Learn. Experienced in building interactive dashboards, automating data workflows, performing ETL, and translating complex datasets into actionable business insights for technical and non-technical stakeholders. Strong foundation in data-driven decision-making, KPI tracking, and business intelligence reporting.

TECHNICAL SKILLS

- Programming & Query Languages: Python, R, SQL (Joins, Subqueries, Window Functions), JavaScript, HTML5, CSS
- Data Analysis & Machine Learning: Pandas, NumPy, EDA, Data Wrangling, Data Cleaning, Feature Engineering, Statistical Analysis, Predictive Modeling, Scikit-Learn
- BI, Visualization & Reporting: Power BI, Tableau, Advanced Excel (Pivot Tables, VLOOKUP, Macros), KPI Tracking, Dashboard Development, Data Visualization, Business Intelligence
- Tools & Frameworks: Django, Flask, REST API, Git/GitHub, Jupyter Notebook, VS Code, ETL Workflows

WORK EXPERIENCE

Data Science Intern — Cognifyz Technologies, New Delhi

Mar 2026 – Apr 2026

- Cleaned and preprocessed restaurant datasets with 10,000+ records in Python using Pandas and NumPy, resolving missing values, duplicates, and outliers to significantly improve data quality and reliability for downstream analysis.
- Performed exploratory data analysis (EDA) and visualized trends using Matplotlib and Seaborn, uncovering key restaurant performance patterns that directly informed data-driven business recommendations.
- Built and tuned machine learning models (Linear Regression, Decision Tree, Random Forest) for restaurant rating prediction, improving model accuracy through iterative feature selection and hyperparameter tuning, evaluated using RMSE and R^2 .

Data Analyst Intern — MedTourEasy, New Delhi

Oct 2025 – Feb 2026

- Analyzed healthcare datasets using Excel, SQL, Tableau, and R over a 4-month data analytics traineeship, supporting data-driven decision-making for cross-functional stakeholder teams.
- Conducted end-to-end data cleaning, EDA, and statistical analysis on large-scale healthcare datasets to prepare data for reporting and visualization, streamlining the overall reporting workflow.
- Designed interactive Tableau and Excel dashboards to track KPIs, enabling data-driven stakeholder decisions and significantly improving reporting turnaround and decision-making speed.

PROJECTS

- AI & ML Projects: Built predictive models for Restaurant Rating Prediction, Customer Behaviour Prediction, House Price & Salary Prediction, and Sales/Demand Forecasting using Linear Regression, Decision Tree, Random Forest, and classification algorithms.
- Python Automation: Developed data-driven automation tools including a Spotify Playlist Bot, Amazon Price Tracker, Flight Finder, Rain Alert App, Stock News Monitor, and a Password Manager GUI (Tkinter).
- Django Web Applications: Built full-stack web apps (Blog Post Website, TODO App, EPR Model) using HTML, CSS, JavaScript, and database management, integrating REST APIs.

RELEVANT COURSEWORK

- Data Structures & Algorithms, Database Management Systems (DBMS), Statistics & Probability, Machine Learning, Python Programming, Data Analytics & Visualization — B.Sc. (Hons) Computer Science

EDUCATION

B.Sc. (Hons) Computer Science — PGDAV College, University of Delhi, New Delhi

Expected Jun 2026
