

PRANTIK PAL

Data Analyst | Python, SQL, Power BI & Tableau | Data Visualization & Statistical Analysis
+91 8700810188 | developerpsquare356@gmail.com | New Delhi, India | [linkedin.com/in/prantik-pal-a86690256](https://www.linkedin.com/in/prantik-pal-a86690256) | github.com/developerpsquare356

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in Python, SQL, Power BI, and Tableau, specializing in data wrangling, exploratory data analysis (EDA), statistical analysis, and predictive modeling (Linear Regression, Decision Tree, Random Forest) using Pandas, NumPy, Matplotlib, Seaborn, and Scikit-Learn. Experienced in building interactive dashboards, automating data workflows, performing ETL, and translating complex datasets into actionable business insights for technical and non-technical stakeholders. Strong foundation in data-driven decision-making, KPI tracking, and business intelligence reporting.

EDUCATION

B.Sc. (Hons) Computer Science - PGDAV College, University of Delhi, New Delhi

Expected Jun 2026

TECHNICAL SKILLS

- **Programming & Query Languages:** Python, R, SQL (Joins, Subqueries, Window Functions), JavaScript, HTML5, CSS
- **Data Analysis & Machine Learning:** Pandas, NumPy, EDA, Data Wrangling, Data Cleaning, Feature Engineering, Statistical Analysis, Predictive Modeling, Scikit-Learn
- **BI, Visualization & Reporting:** Power BI, Tableau, Advanced Excel (Pivot Tables, VLOOKUP, Macros), KPI Tracking, Dashboard Development, Data Visualization, Business Intelligence
- **Tools & Frameworks:** Django, Flask, REST API, Git/GitHub, Jupyter Notebook, VS Code, ETL Workflows

WORK EXPERIENCE

Data Science Intern - Cognifyz Technologies, New Delhi

Mar 2026 - Apr 2026

- Cleaned and preprocessed restaurant datasets with 10,000+ records in Python using Pandas and NumPy, resolving missing values, duplicates, and outliers to improve data quality and reliability for downstream analysis.
- Performed exploratory data analysis (EDA) and visualized trends using Matplotlib and Seaborn, uncovering key restaurant performance patterns that informed data-driven business recommendations.
- Built and tuned machine learning models (Linear Regression, Decision Tree, Random Forest) for restaurant rating prediction, improving accuracy through iterative feature selection and hyperparameter tuning, evaluated using RMSE and R-squared.

Data Analyst Intern - MedTourEasy, New Delhi

Oct 2025 - Feb 2026

- Analyzed healthcare datasets using Excel, SQL, Tableau, and R over a 4-month data analytics traineeship, supporting data-driven decision-making for cross-functional stakeholder teams.
- Conducted end-to-end data cleaning, EDA, and statistical analysis on large-scale healthcare datasets to prepare data for reporting and visualization, streamlining the overall reporting workflow.
- Designed interactive Tableau and Excel dashboards to track KPIs, enabling data-driven stakeholder decisions and improving reporting turnaround and decision-making speed.

PROJECTS

Hotel Booking Business Intelligence Dashboard | Business Analyst Assignment - TravClan

Tech Stack: Power BI, Excel, Business Analysis, Data Visualization

GitHub: <https://github.com/developerpsquare356/TravClan-Work/tree/main/TravClan>

- Completed a business analytics assignment for TravClan, analyzing 30,000+ hotel bookings to identify revenue trends, booking patterns, and cancellation insights.
- Built an interactive Power BI dashboard tracking KPIs including INR 752M+ revenue, average booking value, and cancellation rate.
- Identified seasonal demand, booking channel performance, and room-category trends to support business decisions; recommended pricing optimization and cancellation reduction strategies.

AI Product Evaluation & Benchmarking | Product Analyst Assignment - Josh Talks

Tech Stack: Product Analytics, AI Evaluation, Excel, Reporting

GitHub: <https://github.com/developerpsquare356/Josh-Talks/tree/main/Josh%20Talks>

- Completed a product analytics assignment for Josh Talks, evaluating leading AI image-generation models for Indian e-commerce use cases.
- Designed an evaluation framework covering prompt adherence, visual realism, product presentation, cultural accuracy, and user preference.
- Compared model performance using participant ratings and delivered structured recommendations to improve AI-generated product quality and user experience.

Data Analytics Projects | *Data Analyst Internship - Oasis Infobyte*

Tech Stack: Python, SQL, Power BI, Excel, Pandas

GitHub: <https://github.com/developerpsquare356/OIBSIP/tree/main/OIBSIP>

- Completed multiple data analytics projects during the Oasis Infobyte Data Analyst Internship, performing data cleaning, preprocessing, EDA, and KPI reporting using Python and Excel.
- Built dashboards and visual reports to communicate business insights and support data-driven decision-making; documented workflows and findings on GitHub.

AI & Machine Learning Projects

Tech Stack: Python, Scikit-learn, Pandas, NumPy

GitHub: <https://github.com/developerpsquare356/ML-Projects/tree/main/Ai%20%26%20ML>

- Developed machine learning solutions including Restaurant Rating Prediction, Customer Behaviour Prediction, House Price Prediction, Salary Prediction, and Sales Forecasting.
- Applied feature engineering, model evaluation, and predictive modeling using regression and classification algorithms, visualizing insights with industry-standard metrics.

Python Automation Projects

Tech Stack: Python, APIs, Web Scraping, Automation

GitHub: <https://github.com/developerpsquare356/Python-Projects>

- Developed automation tools including Amazon Price Tracker, Flight Finder, Spotify Playlist Automation, Rain Alert App, Stock News Monitor, and Password Manager.
- Integrated APIs, web scraping, scheduling, and email notifications to automate repetitive tasks.

Django Web Applications

Tech Stack: Django, HTML, CSS, JavaScript, SQLite

GitHub: <https://github.com/developerpsquare356/Blog-post-website>

- Built full-stack web applications including a Blog Platform, To-Do Application, and ERP-style management system.
- Implemented authentication, CRUD operations, database integration, and responsive user interfaces using Django.

RELEVANT COURSEWORK

Data Structures & Algorithms, Database Management Systems (DBMS), Statistics & Probability, Machine Learning, Python Programming, Data Analytics & Visualization - B.Sc. (Hons) Computer Science
